

9. FS Authorized closure dates: [ \_\_\_\_ ]  
1 = All year  
2 = Seasonal: From \_\_\_\_\_ to \_\_\_\_\_  
3 = Not in FS inventory

10. Is the closure being checked within the FS authorized closure dates?  
[ ] 1. Yes [ ] 2. No [ ] 3. Not in FS inventory

11. Status of closure device as described by RSP inventory: [ \_\_\_\_ ]  
1 = Exists and effectively closes road segment to all vehicles.  
2 = Indicated by FS inventory, but no device found in field check.  
3 = Exists but does not effectively close road to some or all vehicles.

*If #3 above, answer question 12. Otherwise, skip to question 13.*

12. Why is closure not effective? [ \_\_\_\_ ]  
1 = Vandalism  
2 = Unlocked gate  
3 = Detour that allows ORVs to bypass closure.  
4 = Open access to anyone with a gate key.  
5 = Detour that allows all motorized vehicles

13. Please photograph all closures: Roll # \_\_\_\_\_ Frame # \_\_\_\_\_

14. Total segment length—measured by odometer or estimated from map: [ \_\_\_\_\_ ]

15. What kind of road is this? [ \_\_\_\_ ]  
0 = user created (4WD, dirtbike or ORV) 5 = private access road or driveway  
1 = logging system road 6 = powerline access  
2 = skid trail 7 = ranch/fenceline  
3 = fire road 8 = firewood cutting  
4 = mining road 9 = other: \_\_\_\_\_

16. Rate the degree of use on road: [ \_\_\_\_ ]  
0 = no use evident  
1 = game, non-motorized, or foot use evident  
2 = ORV tracks visible  
3 = standard vehicle or 4WD tracks visible  
4 = bare soil evident from tire wear; no distinct tracks

17. Rate the vegetation present on TW: [ \_\_\_\_ ]  
0 = primarily trees (< 50% of cover is brush, grass or soil)  
1 = primarily brush (< 50% of cover is grass or soil)  
2 = primarily grass (< 25% bare soil exposed)  
3 = grass/forbs intermittent with bare soil (bare soil area is between 25-50%)  
4 = primarily bare soil (bare soil is > 50% of surface)

18. What is status of the worst erosion on TW? [ \_\_\_\_ ]  
0 = erosion negligible, surface stable with no ruts  
1 = TW surface flow, wheel ruts > 1" deep  
2 = overland surface flow channeled down TW (seasonal channel)  
3 = live stream channeled down TW  
4 = unstabilized slumping of TW cut slopes

19. How many stream crossings are there on TW? [ \_\_\_\_ ]

20. Evidence of illegal dumping? [ ] 1. Yes [ ] 2. No

21. Photograph of road: Film roll # \_\_\_\_\_ Frame # \_\_\_\_\_

22. Comments: (e.g. evidence of noxious weeds, notes on road or closure, is the road getting use?)

Inspected by: \_\_\_\_\_ Date: \_\_\_\_\_  
use initials or full name
