

**ROAD RECONNAISSANCE SUMMARY**

|        |       |       |
|--------|-------|-------|
| ROAD#: | Crew: | Date: |
|--------|-------|-------|

**Overall Road Information**

|                    |      |      |              |       |          |         |            |            |
|--------------------|------|------|--------------|-------|----------|---------|------------|------------|
| Is road closed?    | Yes  | No   | If so, how?  | Gate  | Veg      | Rocks   | Recon tour | Kelly Hump |
| Is road driveable? | Yes  | No   | If not, why? | Veg   | Outslope | Narrow  |            |            |
| Is road vegetated? | Yes  | No   | If so, what? | Grass | Shrubs   | Trees-> | Diam.____  |            |
| Wheel paths veg?   | Yes  | No   | If so, what? | Grass | Shrubs   | Trees-> | Diam.____  |            |
| Road bed soil->    | Silt | Sand | Semi-Rocky   | Rocky |          |         |            |            |

**General Culvert Information**

|                                   |     |    |                    |           |              |
|-----------------------------------|-----|----|--------------------|-----------|--------------|
| Culverts present in drainageways? | Yes | No | Are drainageways-> | Perennial | Intermittent |
| H2O in drainageways?              | Yes | No |                    |           |              |

**Culvert Data**

| #  | 18" 24" 36" 48" 60" | Plugged? Bedload or Wood? | Outlet scouring? | Outlet perched? How high above H2O surface? | Height of fill at culvert outlet? | Bankful width? | Stream Type: A1-6, B1-6, C1-6, D, E |
|----|---------------------|---------------------------|------------------|---|-----------------------------------|----------------|-------------------------------------|
| 1  |                     |                           |                  |   |                                   |                |                                     |
| 2  |                     |                           |                  |   |                                   |                |                                     |
| 3  |                     |                           |                  |   |                                   |                |                                     |
| 4  |                     |                           |                  |   |                                   |                |                                     |
| 5  |                     |                           |                  |   |                                   |                |                                     |
| 6  |                     |                           |                  |   |                                   |                |                                     |
| 7  |                     |                           |                  |   |                                   |                |                                     |
| 8  |                     |                           |                  |   |                                   |                |                                     |
| 9  |                     |                           |                  |   |                                   |                |                                     |
| 10 |                     |                           |                  |   |                                   |                |                                     |

**Road Drainage**

|                         |     |    |                           |      |       |       |
|-------------------------|-----|----|---------------------------|------|-------|-------|
| Waterbars/crossdrains ? | Yes | No | # Ditch Relief Culverts:  | 2-10 | 10-20 | 20-30 |
| D.R. culverts plugged?  | Yes | No | Significant H2O in ditch? | Yes  | No    |       |
| Ditch erosion present?  | Yes | No |                           |      |       |       |

**Erosion**

|  |     |     |                          |                          |      |        |
|--|-----|-----|--------------------------|--------------------------|------|--------|
| Cut/fill slopes vegetated?                 | Yes | No  | Amount of veg. cover?    | Sparse                   | Mod  | Dense  |
| Type of veg. on cut/fill?                  | Grs | Shr | Tree                     | Cut/fill slope slumping? | Yes  | No     |
| Cut slopes seeping?                        | Yes | No  | If so, assoc. erosion->  | Light                    | Mod  | Severe |
| Roadbed erosion?                           | Yes | No  | If so, rut depths -->    | 0-2"                     | 2-6" | >6"    |
| Significant sediment movement beyond road? | Yes | No  | Dimensions of slump? --> |                          |      |        |

**Historical Features**

|   |
|---|
| Cabins, rockwork, lookout, corrals, mining piles, etc.? |
| Location?   |

**Weed Infestations**

|   |
|---|
| Knapweed, leafy spurge, toadflax, sulphur cinquefoil? |
| Location?   |
